

Petition to Central Coast Council

To Remove

**The Traffic calming construction in the
Main Street of Penguin and to Increase
parking times in Penguin.**

15 September 2016

CENTRAL COAST COUNCIL

Division

Rec'd 20 SEP 2016

File No

Doc. Id

Petition to Central Coast Council

The subject matter of this petition is for the Central Coast Council to **remove** the "Traffic calming" construction in the Main Street of Penguin.

We, the undersigned, hereby petition the Central Coast Council at the next meeting to remove the concrete petition, poles and yellow bollards in the centre of Main Street Penguin.

This structure is causing congestion and confusion, it is pushing traffic into parked vehicles and endangering the lives of the pedestrians that this structure was designed to protect. We are a tourist friendly town and it is very difficult for 2 heavy vehicles ie trucks, RV's, caravans and buses to pass at the same time.

Disabled drivers are also distressed at the inadequate parking spots that have been designated for them, as they are not left enough room to exit their vehicles.

We, further petition the Central Coast Council to increase the parking times in our town.

Since the Parking Inspector has been appointed our customers do not have enough time to shop also our visitors don't have enough time to look around and enjoy our Seaside Village. This will result in lost revenue for our town.

Further, this petition has only been arrived at after considerable discussion in the community over a number of weeks deeming this a necessity.

Petition to Central Coast Council

The subject matter of this petition is for the Central Coast Council to **remove** the "Traffic calming" construction in the Main Street of Penguin.

We, the undersigned, hereby petition the Central Coast Council at the next meeting to remove the concrete petition, poles and yellow bollards in the centre of Main Street Penguin.

This structure is causing congestion and confusion, it is pushing traffic into parked vehicles and endangering the lives of the pedestrians that this structure was designed to protect. We are a tourist friendly town and it is very difficult for 2 heavy vehicles ie trucks, RV's, caravans and buses to pass at the same time.

Disabled drivers are also distressed at the inadequate parking spots that have been designated for them, as they are not left enough room to exit their vehicles.

We, further petition the Central Coast Council to increase the parking times in our town.

Since the Parking Inspector has been appointed our customers do not have enough time to shop also our visitors don't have enough to look around and enjoy our Seaside Village. This will result in lost revenue for our town.

Further, this petition has only been arrived at after considerable discussion in the community over a number of weeks deeming this a necessity.

Petition to Central Coast Council

The subject matter of this petition is for the Central Coast Council to remove the "Traffic calming" construction in the Main Street of Penguin.

We, the undersigned, hereby petition the Central Coast Council at the next meeting to remove the concrete petition, poles and yellow bollards in the centre of Main Street Penguin.

This structure is causing congestion and confusion, it is pushing traffic into parked vehicles and endangering the lives of the pedestrians that this structure was designed to protect. We are a tourist friendly town and it is very difficult for 2 heavy vehicles ie trucks, RV's, caravans and buses to pass at the same time.

Disabled drivers are also distressed at the inadequate parking spots that have been designated for them, as they are not left enough room to exit their vehicles.

We, further petition the Central Coast Council to increase the parking times in our town.

Since the Parking Inspector has been appointed our customers do not have enough time to shop also our visitors don't have enough to look around and enjoy our Seaside Village. This will result in lost revenue for our town.

Further, this petition has only been arrived at after considerable discussion in the community over a number of weeks deeming this a necessity.

The subject matter of this petition is for the Central Coast Council to remove the "Traffic calming" construction in the Main Street of Penguin.

We, the undersigned, hereby petition the Central Coast Council at the next meeting to remove the concrete petition, poles and yellow bollards in the centre of Main Street Penguin.

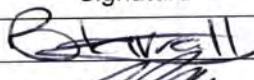

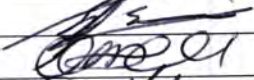

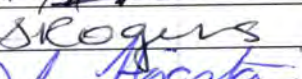

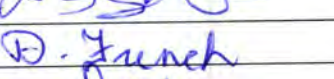

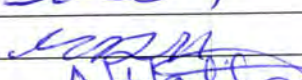

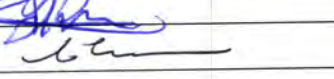

This structure is causing congestion and confusion, it is pushing traffic into parked vehicles and endangering the lives of the pedestrians that this structure was designed to protect. We are a tourist friendly town and it is very difficult for 2 heavy vehicles ie trucks, RV's, caravans and buses to pass at the same time.

Disabled drivers are also distressed at the inadequate parking spots that have been designated for them, as they are not left enough room to exit their vehicles.

We, further petition the Central Coast Council to increase the parking times in our town.

Since the Parking Inspector has been appointed our customers do not have enough time to shop also our visitors don't have enough time to look around and enjoy our Seaside Village. This will result in lost revenue for our town.

Further, this petition has only been arrived at after considerable discussion in the community over a number of weeks deeming this a necessity.

Petition to Central Coast Council

The subject matter of this petition is for the Central Coast Council to **remove** the "Traffic calming" construction in the Main Street of Penguin.

We, the undersigned, hereby petition the Central Coast Council at the next meeting to remove the concrete petition, poles and yellow bollards in the centre of Main Street Penguin.

This structure is causing congestion and confusion, it is pushing traffic into parked vehicles and endangering the lives of the pedestrians that this structure was designed to protect. We are a tourist friendly town and it is very difficult for 2 heavy vehicles ie trucks, RV's, caravans and buses to pass at the same time.

Disabled drivers are also distressed at the inadequate parking spots that have been designated for them, as they are not left enough room to exit their vehicles.

We, further petition the Central Coast Council to increase the parking times in our town.

Since the Parking Inspector has been appointed our customers do not have enough time to shop also our visitors don't have enough time to look around and enjoy our Seaside Village. This will result in lost revenue for our town.

Further, this petition has only been arrived at after considerable discussion in the community over a number of weeks deeming this a necessity.

The subject matter of this petition is for the Central Coast Council to remove the "Traffic calming" construction in the Main Street of Penguin.

We, the undersigned, hereby petition the Central Coast Council at the next meeting to remove the concrete petition, poles and yellow bollards in the centre of Main Street Penguin.

This structure is causing congestion and confusion, it is pushing traffic into parked vehicles and endangering the lives of the pedestrians that this structure was designed to protect. We are a tourist friendly town and it is very difficult for 2 heavy vehicles ie trucks, RV's, caravans and buses to pass at the same time.

Disabled drivers are also distressed at the inadequate parking spots that have been designated for them, as they are not left enough room to exit their vehicles.

We, further petition the Central Coast Council to increase the parking times in our town.

Since the Parking Inspector has been appointed our customers do not have enough time to shop also our visitors don't have enough time to look around and enjoy our Seaside Village. This will result in lost revenue for our town.

Further, this petition has only been arrived at after considerable discussion in the community over a number of weeks deeming this a necessity.
