

Request to change waste wheelie bin size

The Council Waste Management Collection Service operates with Council supplied mobile garbage bins. These are the only bins that the collection contractor is required to empty.

The standard Council waste bin originally provided to households was a 120 litre size, with a slightly larger 140 litre size available for larger family configurations. No other waste bin sizes are provided by the Council. If approved, there is no charge for an upgrade of your waste bin to the 140 litre size.

Please submit this completed form to the Council in order for your request to be considered, noting that your property may already have been allocated the larger 140 litre bin – please check the rim of your existing waste bin prior to submitting this form.

Requests for a larger bin for the reason of fortnightly collection will not be considered.
